EDUCATION

University of Central Florida

Orlando, FL

Bachelor of Science in Computer Science; GPA: 3.4/4.0

Expected Mar. 2027

- Relevant coursework: Data Structures and Algorithms, Systems Software, Security in Computing, Object-Oriented Programming.

TECHNICAL SKILLS

Languages: C, Java, JavaScript, TypeScript, SQL (PostgreSQL), C#, HTML/CSS

Frameworks & Platforms: React, Vite, Tailwind CSS, Supabase, React Router, Firebase, Unity

Tools & Libraries: Git/GitHub, Linux/Arch Linux, GCC, Valgrind, Vercel, Mapbox GL JS, Recharts, VS Code, Visual Studio

Core Concepts: Data structures and algorithms, graph traversal, object-oriented programming, role-based authentication, relational data modeling, multi-tenant architecture, debugging, memory management

CERTIFICATIONS

Information Technology Specialist: Java | Autodesk Certified User: Fusion 360

PROJECTS

Clearcoat - Multi-Tenant Auto Detailing SaaS CRM | *React, Supabase, PostgreSQL, Tailwind CSS* 2026 – Present

- Designed and deployed a SaaS CRM for auto detailing businesses with dedicated owner, detailer, and client portals for clients, vehicles, appointments, workers, invoices, messaging, and business operations.
- Built Supabase Postgres, authentication, and storage integrations with organization-scoped queries, protected role-based routing, invite-code onboarding, notifications, Mapbox address geocoding, and before/after job photo uploads.
- Implemented end-to-end workflows including a four-step client booking wizard, detailer assignment and scheduling, job completion tracking, booking history, and automatic worker payout creation; deployed live on Vercel.

Nearest Stadium Sort & Search | *C, Hybrid Sorting, Binary Search, Dynamic Memory* 2025

- Processed stadium coordinates relative to a user location and implemented a hybrid merge/insertion sort with deterministic ordering by distance, x-coordinate, and y-coordinate.
- Implemented binary search to answer coordinate queries and return each stadium's rank while managing heap-allocated arrays and validating behavior in a Linux development environment.

Graph-Based Campus Route Planner | *Java, Graphs, BFS, Adjacency Lists* 2026

- Modeled an undirected campus network with adjacency lists and used breadth-first search to find shortest routes from a source through a required gazebo to reachable hydration stations.
- Reconstructed the optimal route with predecessor arrays and implemented deterministic tie-breaking by station identifier for repeatable path selection.

EXPERIENCE

Leasing Agent

Feb. 2026 – Present

Mercury 3100

Orlando, FL

- Guide prospective residents through property tours, qualification requirements, applications, and lease execution while maintaining a professional customer experience.
- Manage high-volume phone, email, and in-person inquiries; document prospect information and follow-up activity to move leads through the leasing pipeline.
- Use leasing and customer data to prioritize follow-ups, identify prospect needs, and support occupancy goals.

Seasonal Operations Assistant

2024 – 2025

Plaza on University

Orlando, FL

- Supported high-volume student move-in and move-out operations by coordinating resident requests, organizing materials, and resolving time-sensitive issues.
- Maintained accurate records and communicated across residents and staff in a fast-paced property-management environment.

COMMUNITY INVOLVEMENT

Craig's Pantry - Food Pantry Volunteer

Sunrise, FL | 100+ hours

Supported food distribution, inventory organization, and respectful assistance for community members in need.
